

	Carbon Reduction Plan	Version 2
---	-----------------------	-----------

Commitment to achieving well-below 2°C trajectory*

Guerbet is committed to achieving well-below 2°C trajectory emissions by 2032. The commitment is for Guerbet as a group, and applies to Guerbet Laboratories Ltd.

Baseline Emissions Footprint

Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2021

Baseline year emissions: EMISSIONS for Guerbet Laboratories Ltd. (tCO2e)

Scope 1: 8.81 tCO2e

Scope 2: 46.71 tCO2e

Scope 3: 391.43 tCO2e:

- Upstream transportation and distribution: 340.15 tCO2e
- Waste generated in Operations: 1.35 tCO2e
- Business Travel: 25.80 tCO2e
- Employee Commuting: 24.13 tCO2e
- Downstream Transportation and Distribution: 0 tCO2e

Total Emissions: 446.95 tCO2e

For the year 2025:

Scope 1: 8.81 tCO2e

Scope 2: 46.71 tCO2e

Scope 3: 373.65 tCO2e:

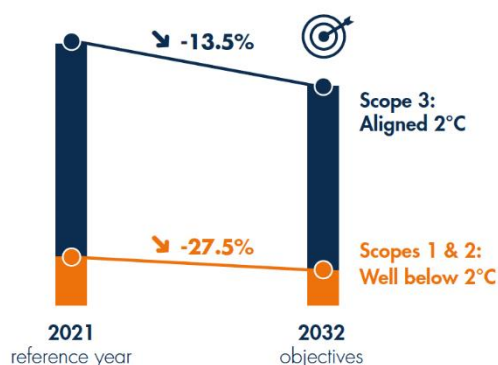

- Upstream transportation and distribution: 288.65 tCO2e
- Waste generated in Operations: 1.41 tCO2e
- Business Travel: 81.40 tCO2e
- Employee Commuting: 25.02 tCO2e
- Downstream Transportation and Distribution: 0 tCO2e

Total Emissions: 451.99 tCO2e

Emissions reduction targets

In order to continue our progress to achieving well-below 2°C trajectory, we have adopted the following carbon reduction targets. We project that carbon emissions will decrease over the next ten years, with a reduction of 16.1%.

Guerbet has decided to commit to at least a “Well below 2°C” trajectory by 2032, starting from reference year 2021. In concrete terms, this trajectory breaks down as follows:

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

Guerbet has implemented a wide range of environmental management measures and carbon reduction initiatives across its operations, including those applicable to its UK activities, as part of a structured decarbonization approach initiated prior to 2021. These efforts were progressively formalized through the deployment of a Group-wide CSR roadmap and climate strategy, embedding emission reduction objectives into industrial operations, procurement practices and supply chain management.

At industrial level, several high-impact projects have already been delivered. A flagship example is the installation of an **evapo-concentrator at the Lanester (France) site**, representing a **€7.2 million investment** supported by ADEME. This project enables **recovery of solvent effluents and waste heat**, delivering a **reduction of approximately 3,700 tones of CO₂ per year**, a **15% reduction in waste**, and contributing up to **25% of the Group's Scope 1 and 2 emissions reduction targets**.

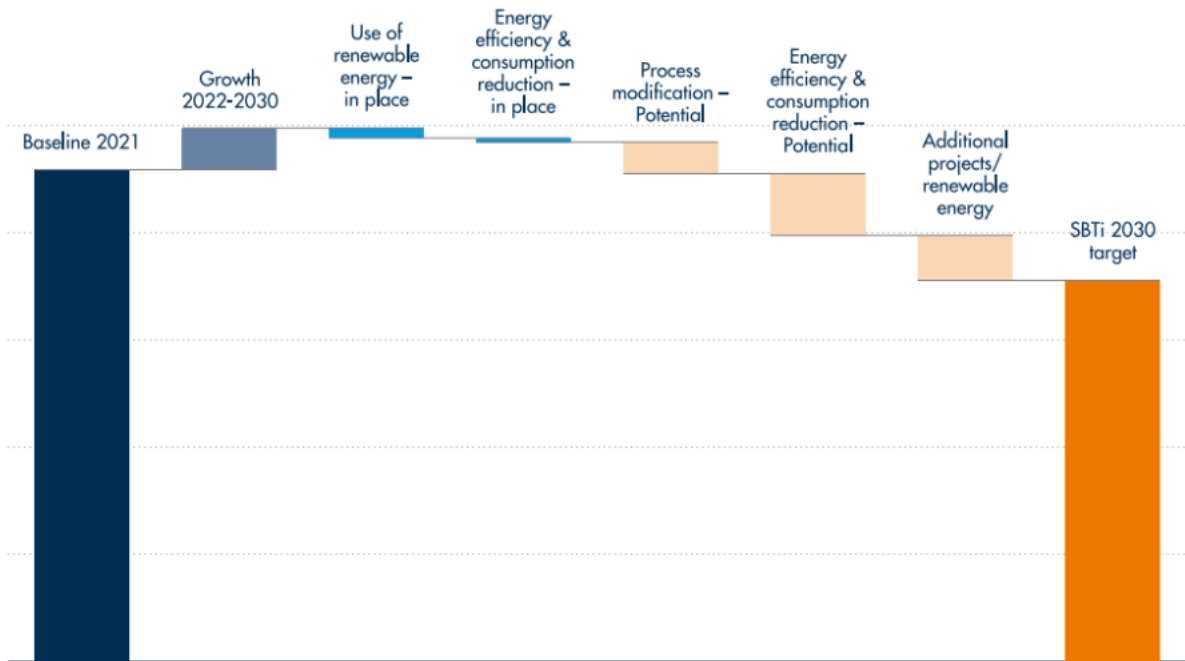

Across production sites, Guerbet has also implemented **continuous process optimization programs**, focusing on:

- Reducing **energy consumption through improved process efficiency and heat recovery systems**.
 - Optimizing **industrial yields and reducing material losses**,
 - Strengthening **waste management and recycling practices**,
- all of which directly contribute to lowering operational emissions.

On the energy and operations side, dedicated action plans have been rolled out to improve performance, including:

- Systematic **energy consumption reduction measures** across sites,
- Integration of **energy efficiency targets into operational KPIs**,
- Deployment of **CAPEX programs to modernize equipment and reduce energy intensity**.

SCOPES 1 & 2 ROADMAP

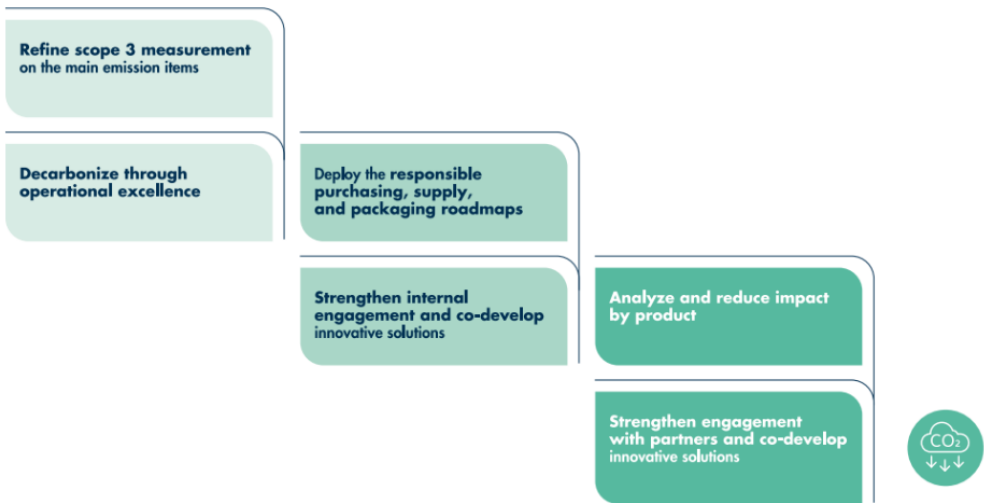

In **procurement and supply chain**, Guerbet has implemented several concrete levers to reduce Scope 3 emissions:

- Deployment of **responsible purchasing practices**, integrating environmental criteria into supplier selection and performance monitoring.
- Optimization of **packaging and logistics flows**, including reduction of packaging volumes and improvement of transport efficiency.
- Strengthening **long-term supplier relationships** to manage resources more efficiently and reduce volatility linked to energy and raw materials.

In addition, **eco-design initiatives** have been introduced for products and packaging, reducing material use and associated emissions, while maintaining the highest quality standards required for healthcare products.

SCOPE 3 ROADMAP

Scope 3 decarbonization roadmap for Guerbet

All these actions are supported by strong governance and continuous monitoring, including:

- Integration of **CSR and energy reduction objectives into executive performance metrics**,
- Regular tracking of progress through the Group’s **CSR roadmap and climate strategy**,
- Inclusion of **decarbonization investments (CAPEX & OPEX)** in medium-term planning.

Importantly, these initiatives reflect a **long-term and cumulative effort**: the Group began implementing emission reduction measures before 2021 and has since continuously expanded and accelerated them. These measures remain fully in place and will be applied in the performance of UK contracts. Guerbet will continue to **scale up these actions and invest in further decarbonization projects**, ensuring alignment with its net zero ambition and strengthening its trajectory toward achieving its long-term emissions reduction targets.

More detailed information can be found in our sustainability statement, pages 130 to 141: https://www.guerbet.com/sites/default/files/2026-04/guerbet_deu-uk_2025_mel.pdf

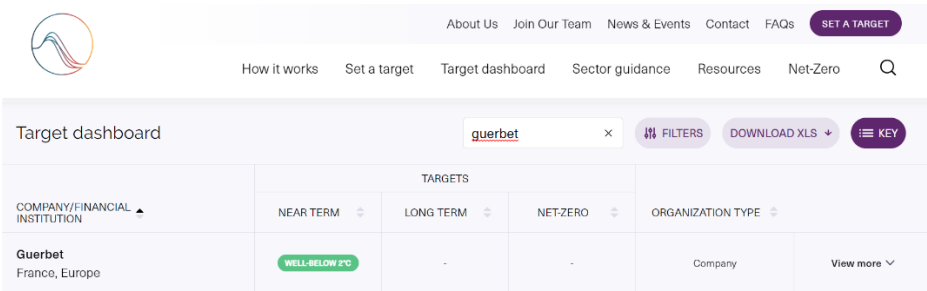

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard** and uses the appropriate emission conversion factors for greenhouse gas company reporting. Furthermore, the scope 1 and 2 reporting is audited by Deloitte during the audit of the consolidated non-financial performance statement in our URD (Universal Registration document).

Scope 1 and Scope 2 emissions have been reported in accordance with GHG Reporting Protocol corporate standard, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard***.

In 2022, Guerbet disclosed its decarbonization objectives and made a commitment to the SBTi. The Group joined the list of Companies Taking Action, i.e., companies that are actively combating global warming. Guerbet’s dossier, submitted to the SBTi in July 2022, was approved in June 2026.
